Griffo Brothers' CamLink™ has released GB\DataTranslate™ for Mazak Matrix

CORVALLIS, Oregon – Griffo Brothers Inc. announces the release of **GB\DataTranslate for Matrix**. With GB\DataTranslate for Matrix, you can write a program for a new Mazak Matrix control, extract compatible information and run it on your older control.

Combined with our previous GB\DataTranslate you can also take a file you saved in an older Mazak control and run it on a newer Mazak Matrix.

GB\DataTranslate for Matrix allows users that currently have a **Mazak Matrix Mill**, Lathe, or MT to take the Mazak Matrix files back down to their older generation controls, thus giving your shop flexibility and improving productivity by utilizing whichever machine is available.

Contact Griffo Brothers Inc. direct at 541.758.8421 or visit them online at www.griffobros.com
